profesional
profile

I'm a software engineer with over 3 years 5 months of commercial iOS development experience. My purpose is to create apps that people just love to use. I'm work with different programming languages but my experience as ios development. I have the experience of having published an app in the app store is DATACRM, additional to advising companies in Colombia, added to this, I worked with companies in Latam and banks in Central America. I have a published IOS course on the Udemy platform which has a rating of 4.7 and more than 768 students throughout South America and Europe. I have worked on small and bigger projects with technologies such as CoreData, CoreLocation, Firebase, TDD, Realm, Push notification, Json Data, Api Rest, RXSwift, Cocoa-pods among others.

Some Areas
Expertise

Area	Level
Storyboard	8
Swift UI	7
Core Data	8
VIPER	10
FastLane	8
Push Notification	7
MVVM	6
Rest	8
UI Y UX	8

Apps
published App Store
